Profile Summary

Passionate AI Engineer with strong expertise in LLMs, RAG pipelines, Computer Vision, and real-time AI systems. Built and deployed a production-ready voice-based AI Interview Platform using Gemini, Groq, and Whisper. Also developed Neuro-Nav-AI, an on-device YOLOv8-powered assistive navigation system for visually impaired users. Proficient in prompt engineering, Python backend development, and deploying ML models. Seeking to leverage deep learning and LLM capabilities at pibit.ai.

Skills

Languages: Python, SQL, Dart, JavaScript

AI/ML: LLMs (Gemini, Groq, OpenAI), RAG, Prompt Engineering, Whisper (Speech-to-Text), YOLOv8, TensorFlow Lite, NLP, PyTorch

Frameworks & Tools: FastAPI, LangChain, Flutter, Next.js, Docker, Git

Cloud & Databases: AWS (Certified), Supabase, PostgreSQL, Firebase

Others: Computer Vision, System Design, DSA, WebSockets, Embedded Systems

Work Experience

Flutter Development Intern
Ignito Corporation

March 2025 – Oct 2025
Remote

- Built 15+ reusable Flutter widgets and optimized API caching, reducing screen load time by **56%** (from 3.2s to 1.4s).
- Integrated REST APIs with JWT authentication and implemented persistent session management.
- Refactored legacy state management into modular architecture using Provider/GetX and repository pattern.

Software Development Intern
Appsy Infotech

Oct 2025 – Dec 2025
Remote

- Developed 10+ RESTful APIs using Python + MySQL for authentication, user management, and real-time features.
- Implemented clean repository and service layers, significantly improving code maintainability and performance.
- Collaborated with cross-functional team using Git workflows and conducted PR reviews.

Projects

AI Interview Platform

2026 – Present

github.com/satyam06050/AI-Interview-Platform

- Designed and deployed a full-stack voice-based AI mock interview system using Gemini Flash, Groq, and Whisper for real-time contextual interviews with adaptive follow-up questions.
- Built a robust RAG pipeline for resume parsing and generation of personalized, role-specific interview flows.
- Implemented real-time backend with FastAPI + WebSockets, live transcription, text-to-speech, and multi-LLM integration.

- Refactored frontend into modular Next.js + Tailwind components.

Neuro-Nav-AI — Assistive Navigation for Visually Impaired

2026

github.com/satyam06050/Neuro-Nav-AI

- Developed an on-device Computer Vision system using **YOLOv8** + **TensorFlow Lite** for real-time object detection (Person, Vehicle, etc.) running entirely offline on Android.
- Built a hybrid hardware-software solution integrating Arduino (ultrasonic sensors + servo) with Flutter app via USB OTG for real-time sensor-AI fusion.
- Implemented fusion logic engine combining distance sensing and AI detection to deliver intelligent voice navigation alerts with latency of 113–179 ms.
- Achieved low-cost implementation (₹ 2000) with full offline capability, demonstrating end-to-end ML deployment skills.

Education

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

2023 – 2027

B.E. in Computer Science and Systems Engineering

CGPA: 8.56 / 10

Achievements & Coding Profiles

- Solved **100+** problems on LeetCode
- Oracle Cloud Infrastructure 2025 — Generative AI Professional
- AWS Academy Graduate — Machine Learning Foundations & Cloud Foundations
